PROFESSIONAL SUMMARY

Full Stack developer and software engineer with 4+ years of experience designing web applications, REST/SOAP APIs and back-end services for international clients. Experience on finance-heavy platforms: mobile payments (Orange Money, MTN MoMo), online insurance, treasury and money transfers, with access control, JWT authentication and audit logging. Holds a professional Master's degree in software engineering, the Google Cloud Associate Cloud Engineer certification and the Salesforce Platform Developer I certification.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Apex, SQL, SOQL, SOSL, HTML, CSS
- **Backend and APIs:** Spring Boot, Node.js, Express.js, NestJS, Prisma, Strapi, REST API, SOAP, GraphQL, WebSockets
- **Frontend and mobile:** React.js, Next.js, React Native, Vue.js, Electron.js, Lightning Web Components, Visualforce, Tailwind CSS, shadcn/ui, Material UI, TanStack Query, Zustand
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Firebase, Supabase
- **Application security:** JWT authentication, NextAuth, Supabase Auth, RBAC and permission-based access control, audit logging
- **DevOps, testing and tools:** Git, GitHub, GitLab, Bitbucket, Docker, Kubernetes, AWS, GCP, Cloudflare, Vercel, Jira, Trello, Postman, Jest, Testcontainers, Mockito
- **Salesforce:** Apex (Triggers, Batch, Queueable), Lightning Web Components, Flows, Visualforce, Salesforce Community

PROFESSIONAL EXPERIENCE

Full Stack Developer | ARON CLOUD | May 2024 - Present

Afri-insurance - Afri-life, public online insurance portal

- Design and development of a portal for instant quotes and, for travel insurance, online subscription and payment.
- Back-end integrations with the EVO API (AXA Partners) for quotes and policy issuance, and with Smobilpay for Orange Money and MTN MoMo payments.
- Multi-product quote wizards and after-sales workflows (confirmation, PDF contract, email, customer dashboard), reducing in-branch processing.

Technologies: Next.js, Prisma, PostgreSQL, NextAuth, Tailwind CSS, EVO API, Smobilpay

Senior Backend Engineer - Ingozen, stock and distribution platform (electronics, Cameroon)

- Multi-role API for inventory, sales, purchasing, finance and treasury, across multiple warehouses and points of sale.
- Dual stock (serialized IMEIs and quantities), dynamic pricing by channel, supplier workflows, transfers and physical inventory counts.
- RBAC through permission sets, audit log, period closings and treasury controls, PDF reports, S3 storage, Prometheus metrics.

Technologies: NestJS, TypeScript, Prisma, PostgreSQL, Supabase, Redis, JWT, WebSockets, REST, Swagger, Jest

Lead Frontend Engineer - School management system, École Privée de Formation des Professionnels de Santé de Meiganga

- Platform with separate portals for students, teachers and administrative staff (enrollment, timetables, grades, courses, records).
- Role-based access control, workflow automation and responsive interfaces.

Technologies: React.js, Next.js 15, Cloudflare, Server Actions, shadcn/ui, Tailwind CSS

Full Stack Developer | ARON CLOUD | May 2024 - Present (continued)

Salesforce Developer - Open Fiber (Field Service Assurance, WFM)

- Extended the Assurance field flow so a partial suspension with a selected appointment creates a real Service Appointment. Address, territory, and work type come from the work order or the current appointment. The shift and schedule come from the slot chosen on screen.
- Added cascade contractor-matching rules for Assurance work orders: network element, manufacturer, special project code, and post-provisioning. Exact values stay together with blank fallback rules, including the empty picklist value Nessuno.
- Covered both behaviors with Apex tests on appointment rescheduling and company selection.

Technologies: Apex, Salesforce Field Service, Triggers, Work Orders, Service Appointments, SOQL

Salesforce Developer - Open Fiber (TTM)

- TTM (Trouble Ticket Management): automation of diagnostics and work orders; integration of the Smarthub, Tibco and PNI APIs; REST/SOAP services for partners.

Technologies: LWC, Apex (Triggers, Batch, Queueable), SOQL, SOSL, Salesforce Email Templates, Postman, Named Credentials, Custom Metadata

Salesforce Developer - Plataforma de Telemedicina, Ministério da Saúde

- Telemedicine platform to manage medical tickets and assign them to the responsible agents (LWC, Apex, Visualforce, REST API); Salesforce Community improvements and Matomo setup.

Software Engineer | Freelance (part-time) | March 2025 - August 2025

Rental Afrique - property management platform

- Platform where tenants manage contracts and invoices, and where landlords register their properties and have them verified.
- Rental score calculation (tenant reliability) and validation workflows for accounts and properties by the support team.

Technologies: Next.js, Cloudflare Workers, Cloudflare R2, Tailwind CSS, PayPal

Full Stack Developer | NOELI CLOUD | March 2022 - May 2024

Backend Developer - Money transfer application

- Back-end with Firebase Cloud Functions and Firestore: transaction-matching algorithm, real-time updates, triggers and event-driven workflows.

Salesforce Solution Designer - Gespro+ (ITW)

- APQP management tool on Salesforce centralizing projects from several legacy systems, for about 80 users.
- Data models, automations, project cloning, document versioning, role-based access control; planning of multilingual support (English, Italian, French) and document integration.

PERSONAL PROJECTS

Fullstack Developer - Edurama (EBEM SaaS), multi-tenant SaaS for secondary schools

- NestJS API with Prisma/PostgreSQL, Supabase JWT and RBAC, BullMQ/Redis jobs, Socket.IO notifications, S3 storage and PDF generation with Puppeteer.
- Next.js 16 interface with Tailwind CSS, TanStack Query and Zustand: per-tenant screens, centralized authentication and permissions.

EDUCATION

- Professional Master's degree in Software Engineering - Sept 2020 - Jul 2022
- Professional Bachelor's degree in Software Engineering - Sept 2019 - Jul 2020
- Higher National Diploma (HND) in Software Engineering - Sept 2017 - Jul 2019

CERTIFICATIONS

- Google Cloud Certified - Associate Cloud Engineer
- Salesforce Certified Platform Developer I
